JUAN SEBASTIAN OSPINA LOSADA

Bogota, Colombia • jolosada1@gmail.com • +57 315 387 8540

Education

SURCOLOMBIANA UNIVERSITY   Neiva, Huila
Software Engineering   April 2023

Experience

CITCD – SURCOLOMBIANA   Neiva - Huila
Software developer   July 2023 – Dec 2023
- Collaborated in the development of applications using technologies such as PHP, and JavaScript.
- Participated in the implementation of projects using frameworks like Angular.
- Worked on the design and maintenance of databases, including SQLServer.
- Utilized GIT for version control and team collaboration.

Technical Skills

Technical: Python, PHP, JavaScript
Framework: React, Angular, Node.js
Database: MySQL, MongoDB, SQLServer
Development Tools: GIT

Projects

ECOMMERCE
I built an e-commerce platform using the MERN stack, integrating MongoDB, Express, React, and Node.js. This project delivers an efficient shopping experience with a modern design. My focus is on providing a secure and engaging platform where users can easily explore and purchase products.
Technologies used:
- MongoDB
- Express
- React
- Node.js

MOVIE PROJECT
Crafted a movie streaming page with React, FastAPI, and MongoDB, offering a unique cinematic experience. The platform enables users to explore and enjoy a diverse film selection through an intuitive interface. Focused on delivering an immersive digital space, the project caters to movie enthusiasts, ensuring easy and thrilling film discovery.
Technologies used:
- MongoDB
- Python
- React
- FastAPI
